

Newton-Wellesley Family Pediatrics, P.C.

Shared Medical Appointment Confidentiality Agreement

Shared medical appointments involve patients sharing private and confidential medical and psychological information in the presence of other patients and family members. Whether you are a patient or a family member, caregiver, or friend accompanying a patient, you must agree to respect the privacy of other patients by keeping confidential information that is revealed and not repeating any of the information discussed in the medical group setting.

By signing this form, you agree and commit to maintaining the confidentiality of the information and the privacy of all those who attend the shared medical appointment.

By signing, I have read and understand the information in this confidentiality agreement. Parents and legal guardians for all patients under 18 and all patients and participants over 18 years of age will each need to sign.
